Movement for Mindfulness is a mixed-age class inviting children to explore joyful movement as a pathway to self-regulation, confidence, and community connection. Through themed experiences such as labyrinth exploration, water-inspired movement and art, and playful balance challenges, students engage their whole bodies and senses while learning to notice how movement, breath, and rhythm support their nervous systems. Instruction blends storytelling, music, visual art, collaborative building, and large motor play while honoring the cultural and Indigenous roots of movement traditions.

Students learn musical theatre skills through rehearsing and performing a kids-length musical! Classes consist of rehearsing songs, dances and scenes from the musical and participating in games and activities to learn about an actor's tools – voice, body and imagination. The session culminates in two spring performances. This enrichment class is for students interested in performing on stage, as everyone is expected to participate; please discuss this with your child prior to enrolling.

This year's musical is *A Kid's Life: A How-To Musical Guide to the Most Daring, Dangerous, Exciting Time ... Like ... Ever!* A massive electromagnetic attack from outer space has jammed all technical systems, and there is no electricity, no cell phones, no laptops – NO FUN! The kids are in a panic and don't know what to do, until Grandpa and Grandma arrive on the scene and introduce them to a day filled with daring and adventure, music and imagination – all without fancy gadgets!

**For students age 8+ on 8/31/25 (if your student is 7 and interested in participating in the musical, please contact Allison Gobat, allison@bridgeschoolcoop.org) Parents are required to contribute to one of three committees throughout the semester: sets, props, or costumes.*

The Outdoor Education Program is a hands-on learning experience where nature is our classroom. We normalize outdoor learning environments while delivering hands-on science and social-emotional learning. Students increase their basic natural sciences knowledge of the outdoors such as identification of common plants/animals, knowledge of weather patterns, life cycles, ecosystems, and outdoor/wilderness safety. Our goal is to help children develop authentic connections to the natural world and feel comfortable outdoors in all seasons. Held at Seahurst Park in Burien, WA, students have access to marine and forest ecosystems to explore. Please send kids with all weather outdoor clothing.
